

Value Added Vehicles – Just The Facts

Off shore Company with no manufacturing plant in North America-less than 1 percent value added to society-dealers selling and servicing cars paying employees low wages-pay little taxes.

Off shore Company with a few manufacturing facilities in North America and none in Canada-less than 3% value added contributions to our society.

Off shore Company with a few manufacturing facilities in North America and some in Canada-less than 15% value added contributions to our society-since they are higher paying jobs such as Honda and Toyota in the Cambridge area where the Big 3 made gains and these companies followed suit as a ploy to keep the Union out of their shops-little or no pensioners or care for our society as a whole.

Big Three Company Vehicles built in many manufacturing facilities in off shore countries-50% value added contributions to our society-many with pensioners get their pay from the company growth in other companies etc.

Big Three Company with a many manufacturing facilities in North America and many in Canada-100% value added contributions to our society-good paying jobs and benefits which pay taxes and can afford to keep our society vibrant-many with pensioners.
